

June 2 - 4 Systemic Constellation Workshop

Saskatoon - Family of Origin Healing with Sherry Heyliger

Family Constellations reveal the hidden dynamics and family attachments that keep us rooted in destructive patterns. As the study of epigenetics has found, family traumas lie at the root of many of the physical, emotional and psychological symptoms we experience. Anxiety, fear, addiction, financial worries, depression, illness and unhappy relationships can all be forms of our unconscious inheritance. These blueprints will unfold in our lives, directing our choices and perceptions and may be passed along to our children as well.

In this workshop you will:

- *identify the traumatic events and unconscious loyalties that affect health, relationships and purpose
- *strengthen boundaries through body awareness and break long-standing patterns of illness, depression, anxiety, fear and unhappiness
- *SHIFT...insights gained from this process can loosen ties to generations of unhappiness and compel a step in the direction of a new life experience

"I know of no other therapy that can produce such immense and expeditious results. Truly Transformational!" ~ Gordon Yuen

"I witnessed this workshop accomplish what decades of psychoanalysis might only scratch the surface of." ~ Dr Robbie Drummond

"The process of the workshop is unbelievable in how it opened doors for me and helped me to understand why so many things/events happened the way they did. The forgiveness and love that unfolds from doing this work is beyond words." ~ Linda Guenther

"Just ask me, it's a chance to do some really deep healing in a short time. The issues I've been working on for the last 35 years took a few hours to shift; huge healing that I never thought possible in this lifetime." ~ Katharina Drummond

Introductory Evening June 2 \$40 Info @ PINKDAKINI.COM
